Work Experience

Full Stack Development Intern - Edureka **Nov 2023 - Dec 2023**

HTML/CSS, Python, React.js, MongoDB, JavaScript

- During my one-month internship as a Full Stack Development Intern, I gained hands-on experience in building and maintaining web applications. I worked with HTML, CSS, JavaScript, and React.js to develop responsive front-end designs and implemented back-end using Node.js, Express.js, and MongoDB/MySQL.

Technical Projects

Seven Star Jwels - Wholesale Jewellery Management & ERP System **2026**

React.js, TypeScript, Tailwind CSS, Supabase, PostgreSQL

GitHub Repository

- Designed and developed a wholesale jewellery management ERP featuring real-time stock ledger, automated Indian GST splitting (CGST/SGST/IGST), and native print-ready A4 tax invoicing.
- Implemented an offline-first hybrid storage architecture with Supabase PostgreSQL and local fallback cache to ensure zero business downtime.
- Built COGS-based Income & Expenditure accounting module, live showroom stock valuation, and automated JSON/CSV ledger backup.

CryptoPulse - Real-Time Cryptocurrency Tracker **2026**

HTML/CSS, React.js, JavaScript

GitHub Repository Live Demo

- The React app displays real-time crypto market data, improving user engagement.
- It uses external APIs to fetch live updates, keeping information current.
- The dashboard offers dynamic visuals for clear data understanding.

Flow25 - SaaS Style Landing Page **2026**

HTML/CSS, React.js, JavaScript

GitHub Repository Live Demo

- The landing page uses responsive design and interactive features to improve user experience.
- Animations and effects add visual appeal and smooth interactions.
- Component structure was optimized for reusability and easier updates.

Problem Solving & Data Structures

Strong ability to analyze problems, design efficient solutions, and implement optimized code. Skilled in applying Data Structures (arrays, linked lists, stacks, queues, trees, graphs) to organize and manage data effectively. Proficient in Algorithms including searching, sorting, recursion, dynamic programming, and graph traversal. Experienced in evaluating solutions using time and space complexity to ensure performance and scalability.
